

Pikes Peak ARES -- Mid-Day Weather Advisory (15 May – 31 August) -- Daily 1230 MST

Calling the Pikes Peak ARES SKYWARN Mid-Day Weather Advisory Net. This is [CALL-SIGN] Net Control with the Mid-day Weather Advisory for El Paso and Teller Counties. This net is held daily from May 15th through August 31st on the Pikes Peak FM Association 146.97 repeater. Should there be a repeater failure, the net will move to the Cheyenne Mountain Repeater Group 147.345 repeater. We will delay taking check-ins until after the briefing information has been read.

Current conditions are as follows:

>>INSERT 1230 BRIEFING SHEET INFO HERE<<

In light of this information, there [will] [will not] be a 3:30 update today. Spotters are encouraged to monitor this repeater [as/should] severe thunderstorm conditions develop.

Are there any questions or comments?

Are there any stations wishing to check in?

(Acknowledge and record check-ins)

We wish to thank the Pikes Peak FM Association (or Cheyenne Mountain Repeater Group) for the use of this repeater.

This is [CALL-SIGN] closing the Pikes Peak ARES Mid-Day Weather Advisory Net at _____ Local . 73 .

(Record net time in minutes and the number of check-ins and report this data to K4ARM)
